NOTABLE PROJECTS

Smart job Recruitment System

- The web application "Job recruitment system" provides an easy and convenient search application for the job seekers to find their desired jobs and for the recruiters to find the right candidate. The recruiter will post their current vacancy with a record, and job seekers can search for current job openings and apply to their desired positions.
  Tools: Django, PostgreSQL, HTML, CSS, Bootstrap.
  Link: https://github.com/Biplob68/DjangoProject

Courier Management System

- A web-based courier system where the customer can order any product to be shipped to the courier at home.The system generates a consignment number for their products, and through this consignment, the customers can track their products from any location.
  Tools: Python, Django, MySQL, HTML, CSS, Bootstrap.
  Link: https://github.com/Biplob68/Courier-management-system

P2P Messaging System

- An android peer-to-peer chatting application where two users can exchange messages and text files. Any user can work on the server or client. One user will connect to another user by port number and IP address.
  Tools: Java, Socket programming, Firebase.
  Link: https://github.com/Biplob68/P2P-Chat-Application

Personality Prediction Based on Twitter Data

- This study applies the personality prediction of a Twitter user based on the words used in tweets posted by the user. The personality type is predicted based on the Big Five Personality Model.
  Tools: Python, Pandas, KNN, Decision Tree.
  Link: https://github.com/Biplob68/Personality-Prediction-Based-on-Twitter-Data

PROBLEM SOLVING ACTIVITIES

- Solved more than 350+ problems on different OJs.
